- **Testing:** Unit testing, Django testing framework
- **E-commerce & Blog Systems:** Custom Django applications

Soft Skills:

- Problem-Solving
- Attention to Detail
- Communication
- Team Collaboration

Experience

I am a dedicated full stack web development with 1 year of experience. I have gained hands-on experience in building scalable and efficient applications, primarily using Django and other modern web technologies. I have successfully completed a project called "BakiPai," which is designed to manage and control all operational details of a super shop. Through this project, I enhanced my skills in backend development, database management, and user interface design, while ensuring system reliability and performance. I have successfully completed three other projects, further expanding my knowledge of backend development, database management, and user interface design. My primary tech stack includes Django and other modern web technologies, allowing me to build reliable, high-performance solutions. I am passionate about problem-solving and continually seek to enhance my expertise in software development.

Education

Cadet Collage Campus'Sishukunjo school and collage

Jhenaidah, Dhaka, Bangladesh

I am currently a student at a **Jhenaidah Cadet Collage Campus'Sishukunjo school and collage**, pursuing my degree while actively enhancing my skills in software development and full stack web development. My education complements my hands-on experience in building applications. I balance academics with practical projects, aiming to deepen my expertise in the tech industry.
